

Build@Home offers a toolbox for borderless connecting and learning. In what way do you include internationalisation in your education? How do you and your students connect with other countries, cultures, languages and customs? Discover that you don't necessarily have to go abroad. That you can also build internationalisation from and in your own environment: @home.

scan and start your world journey today!

"Internationalisation is not a purpose in itself, it is a resource to prepare students for Life Long Learning and working in an intercultural society and an international labour market." **Nuffic**

build together
internationalisation
with Build@Home

welcome to Build@Home

Connect with the world as a teacher or a student. Build@Home is your free toolbox. It helps you to build your own internationalisation program in five easy steps. Even without traveling to other countries. And accessible for everyone. Let's create this database with educational activities and teaching tools together.

1 explore

Why include internationalisation in education? This is the right question to start your journey with. Determine your internationalisation approach with your colleagues.

2 define

From this shared mindset, you can specify goals, opportunities, needs and resources for each target group. A clear basis for your educational activities.

3 choose

Navigate onward to find suitable opportunities in a digital database filled with Build@Home activities. Choose from a variety of examples to connect with the world.

4 experience

Go for it! Realise your Build@Home activity or develop one of your own, using the tools. Let all participants and stakeholders fill in a survey.

5 check

After realizing the chosen Build@home activity, take time to reflect and embed it in your curriculum. How was your international experience? Was it worthwhile? And why? Recap, review, revise, retain and recur!
